Showing [9] routes

PS D:\laragon\www\lensrent>
```

10. Tips: Gunakan Laragon (laragon.net) sebagai alternatif XAMPP - lebih ringan dan mendukung Laravel secara native dengan virtual host otomatis.

AKTIVITAS MANDIRI 2 - Membuat Routing & Controller Dashboard

1. Buat Controller DashboardController: `php artisan make:controller DashboardController`

```
PS D:\laragon\www\lensrent> php artisan make:controller DashboardController  
  
INFO Controller [D:\laragon\www\lensrent\app\Http\Controllers\DashboardController.php] created successfully.
```

2. Tambahkan method `index()` yang mengembalikan `view('dashboard')` di DashboardController

```
app > Http > Controllers > DashboardController.php > ...  
1  <?php  
2  
3  namespace App\Http\Controllers;  
4  
5  use Illuminate\Http\Request;  
6  
7  class DashboardController extends Controller  
8  {  
9      public function index()  
10     {  
11         return view('dashboard');  
12     }  
13 }  
14
```

3. Daftarkan route di `routes/web.php`: `Route::get('/dashboard', [DashboardController::class, 'index'])->name('dashboard')`

```
Route::get('/sewa', function () {return view('formsewa');})->name('sewa.form');  
Route::get('/dashboard', [DashboardController::class, 'index'])->name('dashboard');  
Route::get('/hitung/{a}/{b}', function ($a, $b) {return $a + $b; });
```

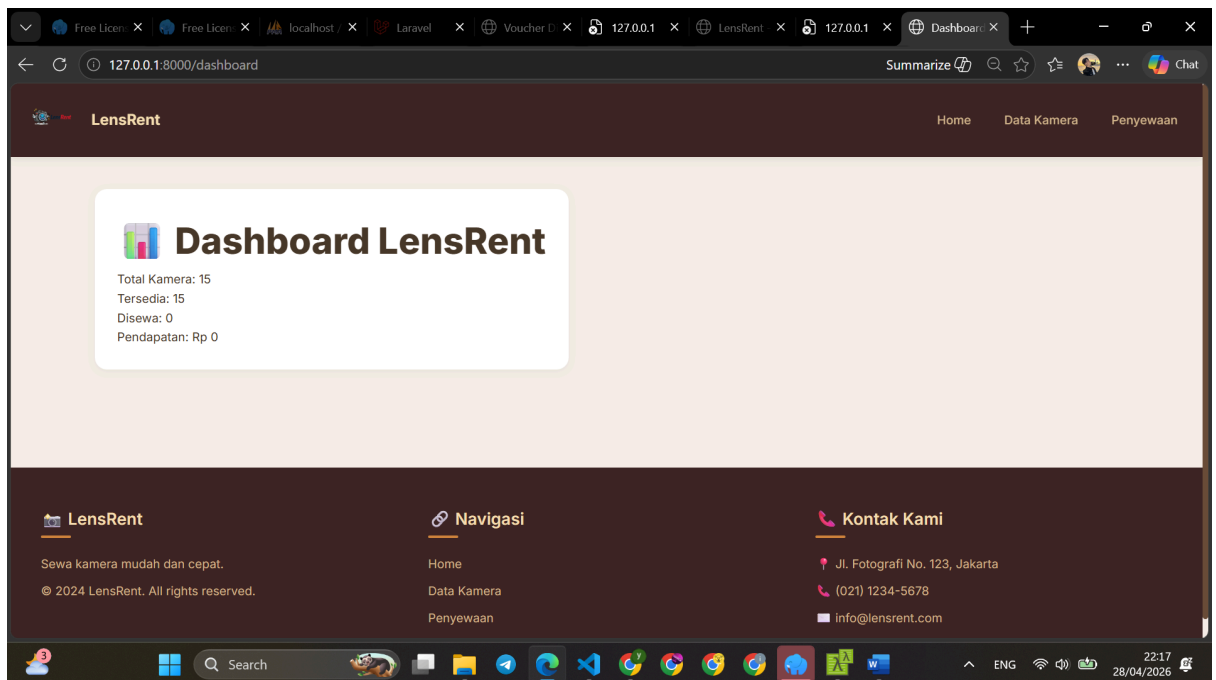

4. Buat file view sementara `resources/views/dashboard.blade.php` berisi `<h1>Dashboard SIAK</h1>`

```

resources > views > dashboard.blade.php > ...
6  @section('content')
7  <div class="container" style="margin-top: 100px;">
8      <div class="deskripsi-card">
9          <h1> Dashboard LensRent </h1>
10         <div id="dashboardStats">
11             <p>Total Kamera: <span id="statTotalKamera">0</span></p>
12             <p>Tersedia: <span id="statTersedia">0</span></p>
13             <p>Disewa: <span id="statDisewa">0</span></p>
14             <p>Pendapatan: <span id="statPendapatan">Rp 0</span></p>
15         </div>
16     </div>
17 </div>
18 @endsection

```

5. Akses <http://127.0.0.1:8000/dashboard> di browser - pastikan tampil

6. Buat route `/tentang` dengan `Route::view('/tentang', 'tentang')` dan buat view-nya

```

Route::view('/tentang', 'tentang')->name('tentang');
Route::get('/hitung/{a}/{b}', function ($a, $b) {return $a + $b; });

```

```
resources > views > tentang.blade.php > ...
1 @extends('layouts.app')
2
3 @section('title', 'Tentang LensRent')
4
5 @section('content')
6 <div class="container" style="margin-top: 100px;">
7   <div class="deskripsi-card">
8     <h2>Tentang LensRent</h2>
9     <p>LensRent adalah platform penyewaan alat fotografi yang didirikan pada tahun 2020. Kami berkomitmen
10    <p>Dengan dukungan tim profesional dan peralatan berkualitas, LensRent siap membantu Anda menghasilkan
11  </div>
12 </div>
13 @endsection
```

7. Jalankan php artisan route:list - amati semua route yang terdaftar

```
PS D:\laragon\www\lensrent> php artisan route:list

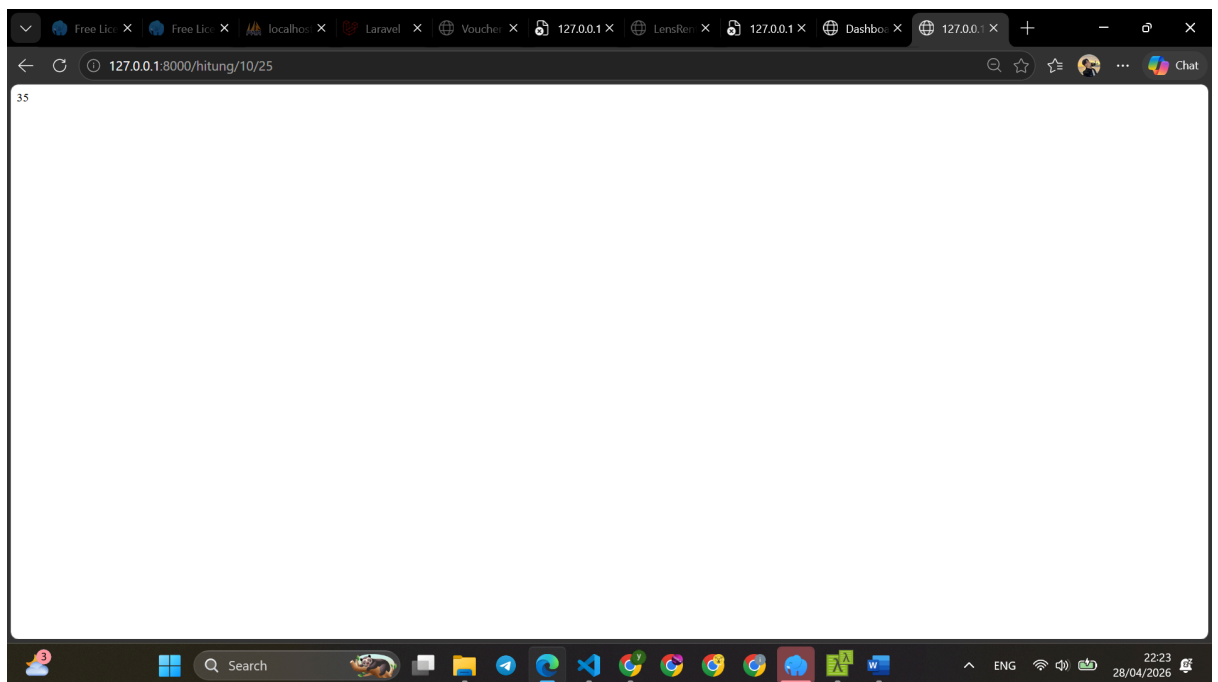

GET|HEAD / ..... home > routes/web.php:6
GET|HEAD dashboard ..... dashboard > DashboardController@index
GET|HEAD hitung/{a}/{b} ..... routes/web.php:11
GET|HEAD kamera ..... kamera.index > routes/web.php:7
GET|HEAD sewa ..... sewa.form > routes/web.php:8
GET|HEAD storage/{path} storage.local > vendor/laravel/framework/src/Illuminate/Filesystem/FilesystemServiceP...
PUT storage/{path} storage.local.upload > vendor/laravel/framework/src/Illuminate/Filesystem/FilesystemServiceP...
GET|HEAD tentang ..... tentang
GET|HEAD up ..... vendor/laravel/framework/src/Illuminate/Foundation/Configuration/ApplicationBuilder.php:223

Showing [9] routes

PS D:\laragon\www\lensrent>
```

8. Coba buat Route::get('/hitung/{a}/{b}', fn(\$a, \$b) => \$a + \$b) dan akses /hitung/10/25

```
Route::get('/hitung/{a}/{b}', function ($a, $b) {return $a + $b; });
```

9. Tips: Route::view() adalah shortcut untuk route yang hanya menampilkan view tanpa logika. Sangat berguna untuk halaman statis seperti 'Tentang Kami'.
