

AKTIVITAS MANDIRI 5 — CRUD Lengkap Mahasiswa

1. Buat Resource Controller: `php artisan make:controller MahasiswaController --resource --model=Mahasiswa`

```
PS D:\laragon\www\lensrent> php artisan make:controller KameraController --resource --model=Kamera
INFO Controller [D:\laragon\www\lensrent\app\Http\Controllers\KameraController.php] created successfully.
PS D:\laragon\www\lensrent>
```

2. Daftarkan di `routes/web.php`: `Route::resource('mahasiswa', MahasiswaController::class)`

```
14
15 Route::resource('kamera', KameraController::class);
16
```

3. Buat semua view: `mahasiswa/index.blade.php` (tabel + pagination), `create.blade.php` (form), `edit.blade.php` (form pre-filled), `show.blade.php` (detail)

```
▼ kamera
  _form.blade.php      U
  create.blade.php     U
  edit.blade.php       U
  index.blade.php      U
```

4. Implementasi method `index()` — ambil semua mahasiswa dengan `paginate(10)` dan tampilkan ke view

```
9 class KameraController extends Controller
10 {
11     public function index()
12     {
13         $kamas = Kamera::latest()->paginate(10);
14         return view('kamera.index', compact('kamas'));
15     }
```

5. Implementasi `create()` dan `store()` — dengan validasi `nim` (unique), `nama` (min:3), `email` (email|unique), `jurusan` (in:SI,TI,MI)

```
17 public function create()
18 {
19     return view('kamera.create');
20 }
21
22 public function store(Request $request)
23 {
24     $validated = $request->validate([
25         'kode' => 'required|unique:kamas|max:10',
26         'nama' => 'required|min:3|max:100',
27         'kategori' => 'required|in:DSLR,Mirrorless',
28         'jumlah' => 'required|integer|min:0',
29         'harga' => 'required|integer|min:1000',
30         'foto' => 'nullable|image|mimes:jpg,jpeg,png|max:2048',
31     ]);
```

6. Implementasi edit() dan update() — tampilkan form dengan old() atau \$mahasiswa->field, validasi unique kecuali ID ini

```
42 public function edit(Kamera $kamera)
43 {
44     return view('kamera.edit', compact('kamera'));
45 }
46
47 public function update(Request $request, Kamera $kamera)
48 {
49     $validated = $request->validate([
50         'kode' => 'required|max:10|unique:kameras,kode,' . $kamera->id,
51         'nama' => 'required|min:3|max:100',
52         'kategori' => 'required|in:DSLR,Mirrorless',
53         'jumlah' => 'required|integer|min:0',
54         'harga' => 'required|integer|min:1000',
55         'foto' => 'nullable|image|mimes:jpg,jpeg,png|max:2048',
56     ]);
57
58     if ($request->hasFile('foto')) {
59         if ($kamera->foto && Storage::disk('public')->exists(str_replace('/storage/', '', $kamera->foto))) {
60             Storage::disk('public')->delete(str_replace('/storage/', '', $kamera->foto));
61         }
62         $path = $request->file('foto')->store('kamera_fotos', 'public');
63         $validated['foto'] = '/storage/' . $path;
64     }
65
66     $kamera->update($validated);
67     return redirect()->route('kamera.index')->with('success', 'Kamera diupdate!');
68 }
```

7. Implementasi destroy() — dengan konfirmasi JavaScript sebelum hapus

```
70 public function destroy(Kamera $kamera)
71 {
72     if ($kamera->foto && Storage::disk('public')->exists(str_replace('/storage/', '', $kamera->foto))) {
73         Storage::disk('public')->delete(str_replace('/storage/', '', $kamera->foto));
74     }
75     $kamera->delete();
76     return redirect()->route('kamera.index')->with('success', 'Kamera dihapus!');
77 }
```

```
<td>
  <a href="{{ route('kamera.edit', $kamera->id) }}" class="btn btn-sm btn-warning">Edit</a>
  <form action="{{ route('kamera.destroy', $kamera->id) }}" method="POST" class="d-inline">
    @csrf @method('DELETE')
    <button type="submit" class="btn btn-sm btn-danger" onclick="return confirm('Yakin hapus?')">Hapus</button>
  </form>
</td>
```

8. Tambahkan flash message di layout dan tampilkan session('success') / session('error')

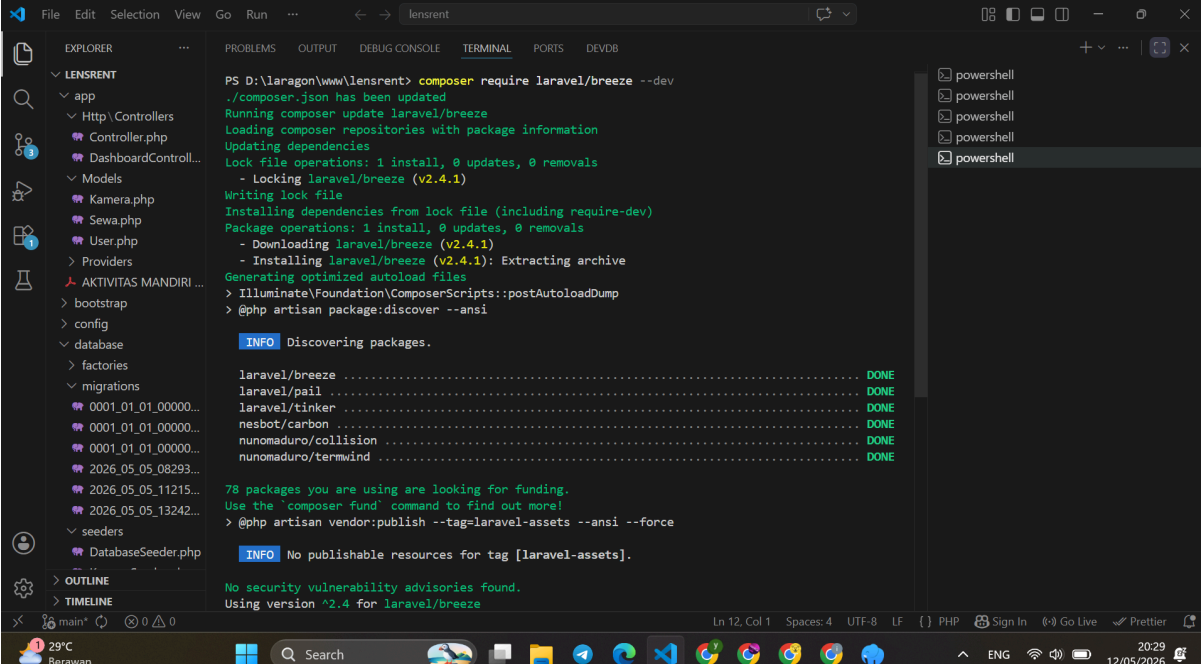

```
30
31 <main>
32     @if(session('success'))
33         <div class="alert alert-success">{{ session('success') }}</div>
34     @endif
35     @if(session('error'))
36         <div class="alert alert-danger">{{ session('error') }}</div>
37     @endif
38     {{ $slot }}
</main>
```

9. BONUS: Tambahkan fitur upload foto profil dengan validasi image|mimes:jpg,png|max:2048

💡 *Tips: Gunakan Route Model Binding (Mahasiswa \$mahasiswa sebagai parameter method) agar Laravel otomatis query findOrFail. Lebih bersih dari Mahasiswa::findOrFail(\$id) manual.*

AKTIVITAS MANDIRI 6 — Middleware & Autentikasi

1. Instal Laravel Breeze: `composer require laravel/breeze --dev`, kemudian php artisan breeze:install blade

```
PS D:\laragon\www\lensrent> composer require laravel/breeze --dev
./composer.json has been updated
Running composer update laravel/breeze
Loading composer repositories with package information
Updating dependencies
Lock file operations: 1 install, 0 updates, 0 removals
  - Locking laravel/breeze (v2.4.1)
Writing lock file
Installing dependencies from lock file (including require-dev)
Package operations: 1 install, 0 updates, 0 removals
  - Downloading laravel/breeze (v2.4.1)
  - Installing laravel/breeze (v2.4.1): Extracting archive
Generating optimized autoload files
> Illuminate\Foundation\ComposerScripts::postAutoloadDump
> @php artisan package:discover --ansi

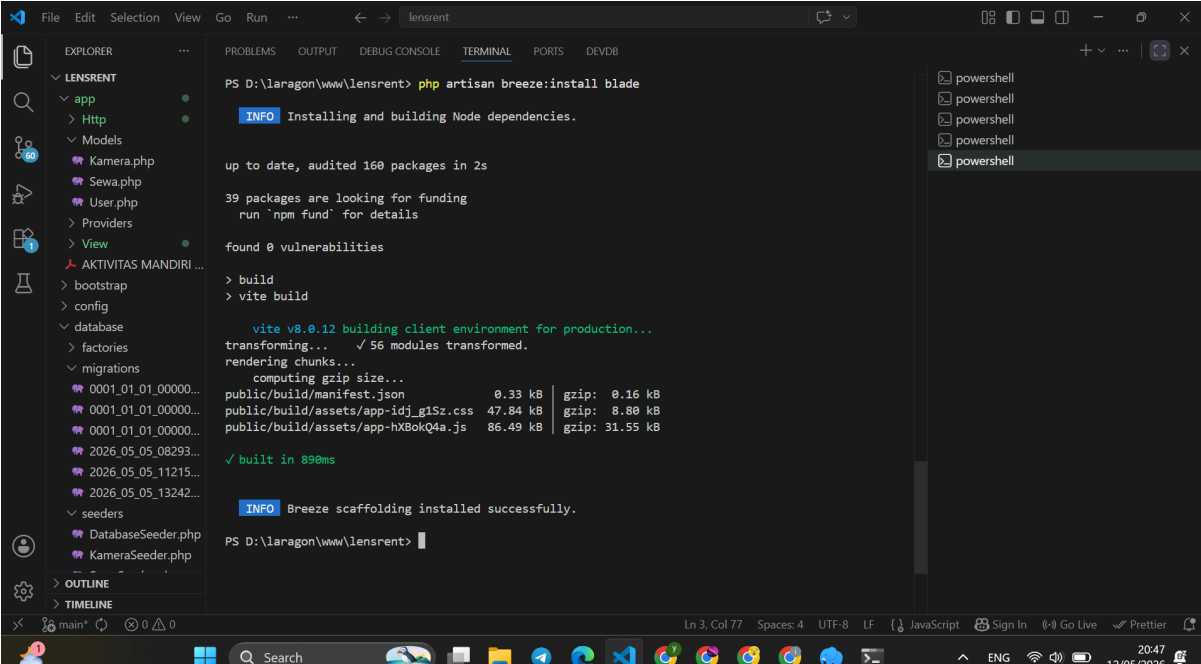

[INFO] Discovering packages.

laravel/breeze ..... DONE
laravel/pail ..... DONE
laravel/tinker ..... DONE
nesbot/carbon ..... DONE
nunomaduro/collision ..... DONE
nunomaduro/termwind ..... DONE

78 packages you are using are looking for funding.
Use the 'composer fund' command to find out more!
> @php artisan vendor:publish --tag=laravel-assets --ansi --force

[INFO] No publishable resources for tag [laravel-assets].

No security vulnerability advisories found.
Using version ^2.4 for laravel/breeze
```

```
PS D:\laragon\www\lensrent> php artisan breeze:install blade

[INFO] Installing and building Node dependencies.

✓ built in 890ms

[INFO] Breeze scaffolding installed successfully.

PS D:\laragon\www\lensrent>
```

2. Jalankan php artisan migrate untuk membuat tabel users

```
PS D:\laragon\www\lensrent> php artisan migrate

[INFO] Nothing to migrate.

PS D:\laragon\www\lensrent>
```

3. Jalankan npm install && npm run dev untuk build assets

```
D:\laragon\www\lensrent>npm install && npm run dev
up to date, audited 160 packages in 2s
39 packages are looking for funding
  run 'npm fund' for details

> dev
> vite

VITE v8.0.12 ready in 500 ms
  → Local:   http://localhost:5173/
  → Network: use --host to expose
  → press h + enter to show help

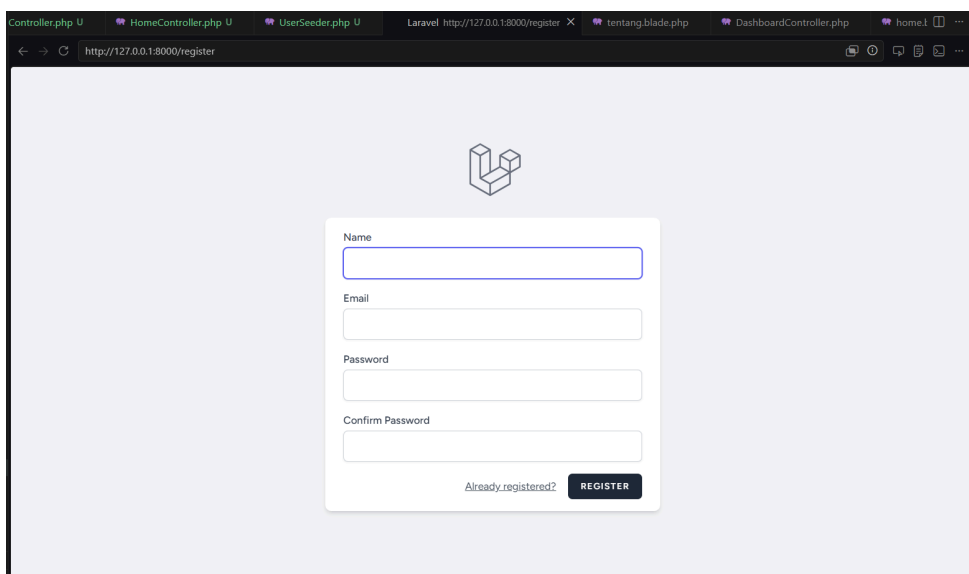

LARAVEL v13.6.8 plugin v3.1.0
  → APP_URL: http://localhost
22.17.34 [vite] (client) [optimizer] bundling dependencies...
```

4. Coba register dan login di <http://127.0.0.1:8000/register>

- halaman login

- halaman register

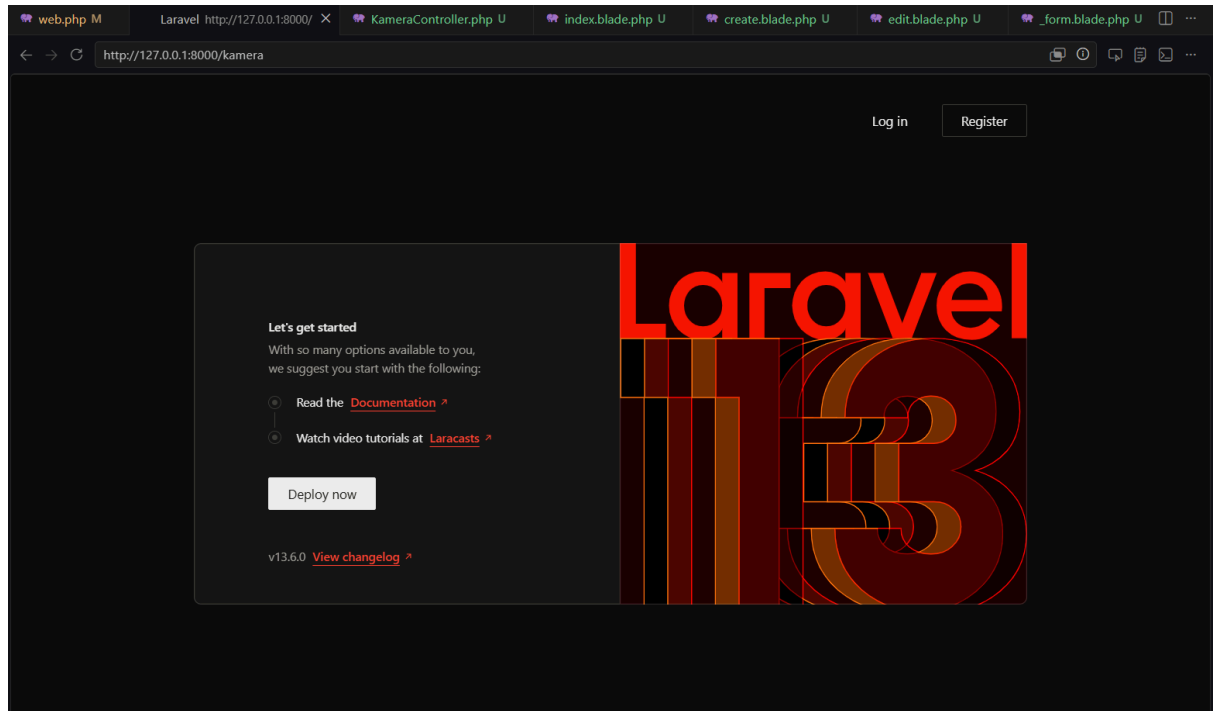

5. Amankan semua route mahasiswa dengan middleware auth:

Route::middleware('auth')->resource('mahasiswa', MahasiswaController::class)

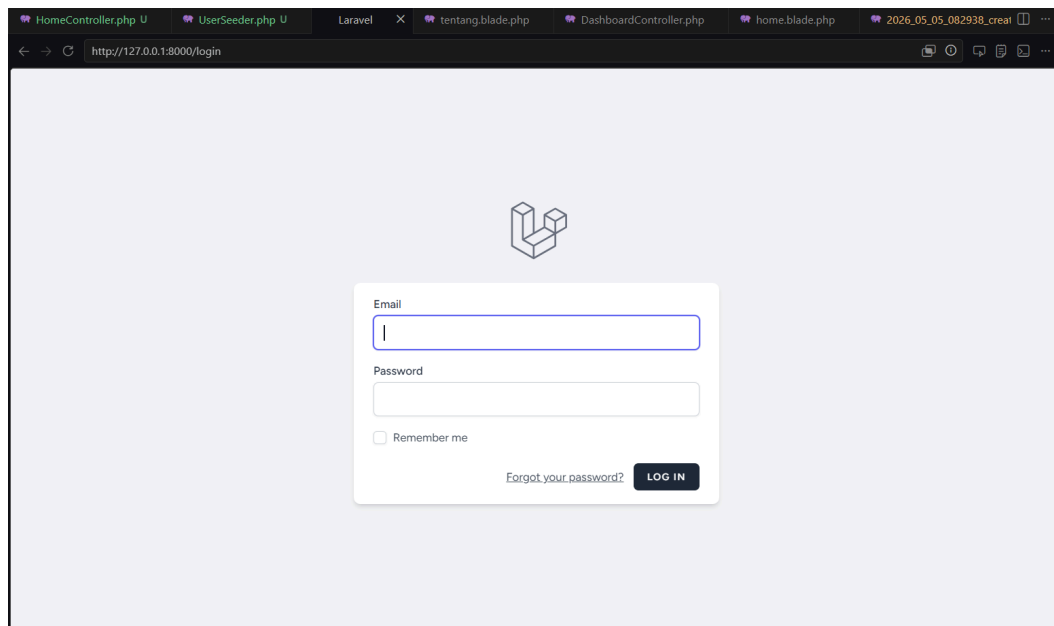

```
20  
21 Route::middleware(['auth'])->resource('kamera', KameraController::class);  
22
```

6. Coba akses /mahasiswa tanpa login — pastikan diredirect ke halaman login

- tampilan awal akses kamera sebelum di enter

- tampilan setelah di enter, web otomatis diredirect ke halaman login

7. Tambahkan nama user di navbar: {{ auth()->user()->name }}

```
resources > views > partials > navbar.blade.php > ...
1 <nav>
2 <div class="nav-left">
3 <div class="logo-icon">
4 
5 </div>
6 <span class="logo-text">LensRent</span>
7 </div>
8 <div class="menu" id="menu">
9 <a href="{{ route('home') }}" class="{{ request()->routeIs('home') ? 'active' : '' }}">Home</a>
10 <a href="{{ route('kamera.index') }}" class="{{ request()->routeIs('kamera.*') ? 'active' : '' }}">Data Kamera</a>
11 <a href="{{ route('sewa.form') }}" class="{{ request()->routeIs('sewa.*') ? 'active' : '' }}">Penyewaan</a>
12 </div>
13 <button class="hamburger" id="hamburger" aria-label="Menu">≡</button>
14 </nav>
15
16 @auth
17 <span class="navbar-text me-3">{{ auth()->user()->name }}</span>
18 <form method="POST" action="{{ route('logout') }}" class="d-inline">
19 @csrf
20 <button type="submit" class="btn btn-link">Logout</button>
21 </form>
22 @else
23 <a href="{{ route('login') }}" class="btn btn-outline-primary me-2">Login</a>
24 <a href="{{ route('register') }}" class="btn btn-primary">Register</a>
25 @endauth
```

8. Buat custom middleware CekAdmin yang hanya mengizinkan user dengan role 'admin' mengakses route tertentu

```
PS D:\laragon\www\lensrent> php artisan make:middleware CekAdmin
INFO Middleware [D:\laragon\www\lensrent\app\Http\Middleware\CekAdmin.php] created successfully.
PS D:\laragon\www\lensrent>

// CRUD kamera hanya untuk admin
Route::middleware(['auth', 'admin'])->group(function () {
    Route::get('/kamera/create', [KameraController::class, 'create'])->name('kamera.create');
    Route::post('/kamera', [KameraController::class, 'store'])->name('kamera.store');
    Route::get('/kamera/{kamera}/edit', [KameraController::class, 'edit'])->name('kamera.edit');
    Route::put('/kamera/{kamera}', [KameraController::class, 'update'])->name('kamera.update');
    Route::delete('/kamera/{kamera}', [KameraController::class, 'destroy'])->name('kamera.destroy');
});
```

9. BONUS: Modifikasi index() Controller agar hanya menampilkan data yang dibuat oleh user yang sedang login

```
11 public function index()
12 {
13     $kamerass = Kamera::latest()->paginate(10);
14     return view('kamera.index', compact('kamerass'));
15 }
16
```

💡 **Tips:** Setelah Breeze terinstal, semua file autentikasi ada di `resources/views/auth/`. Anda bebas modifikasi tampilannya sesuai kebutuhan.
